

**BIG COTTONWOOD CREEK DISTRIBUTION SYSTEM
ORGANIZATION MEETING
MAY 28, 1998
AGENDA**

REVIEW BACKGROUND

PURPOSE OF MEETING

- to begin organization of distribution system
- no decisions will be made today
- to create a system that will allow for the distribution of water according to water right
- to create a system that will provide adequate representation to all water users in the system
- to create a system that will be supported by those regulated within the system
- to create a system that will hopefully reduce the level of water disputes

REVIEW ORGANIZATION OF DISTRIBUTION SYSTEMS - ROLES OF EACH GROUP

Handout

PROPOSAL

Limit the initial boundaries of the system to the diversions that are listed in the decree

- We cannot take on the whole drainage at once - we don't have the manpower
- As we gain experience with the system and as the basic system becomes well established, the boundaries of the system may then be expanded to include the entire drainage.

Set up a committee to work through the details of:

- how the system will be organized and water users represented
- how the business of the system will be conducted
- how the commissioner will be chosen
- how the budget will be set up and assessments made

To begin with, the committee will consist of:

Representatives from the following companies (major water users shown in the decree):

Big Ditch Irrigation Company
Big Cottonwood Tanner Ditch
Brown and Sanford Ditch
Green Ditch Water Co
Lower Canal Co
Upper Canal Co

A representative from Salt Lake City

A representative from the canyon water users

A representative for the smaller irrigation companies and the individual water right owners in the valley.

The representatives will be named by their respective groups.

OTHER IDEAS OR PROPOSALS FOR PROCEEDING

At today's meeting

Submit in writing over the next two weeks, either by mail or FAX (538-7467 - call to let us know that you have FAXED it to us - Karen Peisely 538-7381)

NEXT MEETING

Will send a notice to those on the committee - probably will be during the first part of July - any suggestions for a date ?
